Four grants awarded as part of the Breathing Science, Moving Bodies project

We were able to award four grants to young researchers involved in the study of **breathing pathologies, the prevention of such conditions and the relationship between breathing, movement and wellbeing** thanks to the proceeds from our show which took place at the Verdi Theatre in Padova on 1st May. The award ceremony took place in Palazzo Zacchi-Armeni. Many thanks to our members Federica Pezzuto, Cecilia De Chellis, Elisabetta Balestro e Fiorella Calabrese who promoted the project.

Left, winners of the research grants: Giuseppe Maggioni, Alessandro Bonis, Giacomo Giulianelli and Anna Michielin. Below: our organisers.

TALKING WITH TEENAGERS: A NEW INITIATIVE

In addition to our projects focusing on smoking and AI, this year we will also be offering a new topic:

“Lungs that Breathe the World: Environment, Climate and new Exposures”.

With the new school year about to start, this will also be on the calendar!

**Charities Day, Sunday 27 September
2026,
Prato della Valle
See you there!**
